

New Product: SubDrive Manifold 1-1/4"

We have added a new Manifold Kit to the SubDrive range of products: 1 ¼" BSP

The Manifold Kits are a great way to ensure the correct location of each item as per the installation procedures manual where all the items are correctly spaced to ensure the best performance of your SubDrive installation.

The manifold has 3 sockets for the pressure sensor, pressure gauge and pressure tank. We have also included an isolating valve for the tank and a PN16 gate valve for possible flow control on the larger SubDrive pumps.

Manifold Kit

Manifold when installed

Description	Order No.	List Price excl GST
1 ¼" BSP Manifold Kit	305 701 185	210.00
1 ½" BSP Manifold Kit	305 409 106	270.00

The new 1 ¼" Manifold Kit will be added into our next Price List update.

In the meantime, your Franklin ASM can assist with any further information.
