

## Mobile Training Facility

At last week's 2012 Irrigation Exhibition held in Adelaide we released our latest concept to expand training around the country, our Mobile Training Facility (MTF).

Our Ford AWD diesel Territory coupled to our new dual axle MTF trailer where we come to you for training. We roll in, open the doors, out comes the purpose built training bench, fill the demo tank, slide it out and we are off training and educating. It offers;

- Cut away FE Motors
- Cut away FPS pumps
- Pumps to dismantle and reassemble
- Functional test tank to demonstrate; Pumping conditions, constant pressure with MHQP, VR with Drive-Tech, SubDrive and Solar pump sets.
- Controlled by a PLC with remote access via laptop, mobile phone, iPad or iPhone through the web or SMS.
- 4G communications
- Generator fitted with 12V and 240V

Keep an eye out for us in your region from July.

Want to book some training, please contact us.

Pumps, Motors, Drives and Controls that offer everyday value that are

**'better for your business'** because
