

New Product: **Pontoons and Floats**

We are pleased to announce that we now have available pontoons and floats for various pumping applications from dams, ponds, rivers and creeks.

Bore pumps are utilised and installed in many diverse applications and many times to have the bore pump out in the dam or river gets the best results.

These high quality welded poly pontoons feature a twin float with the poly pump shroud hung by stainless steel adjustable safety wire.

Custom made pontoons and shrouds are available to suit your specific needs along with our standard 4" pontoon off the shelf.

The 4" PMA pontoon is designed to handle all Franklin pumps sets:

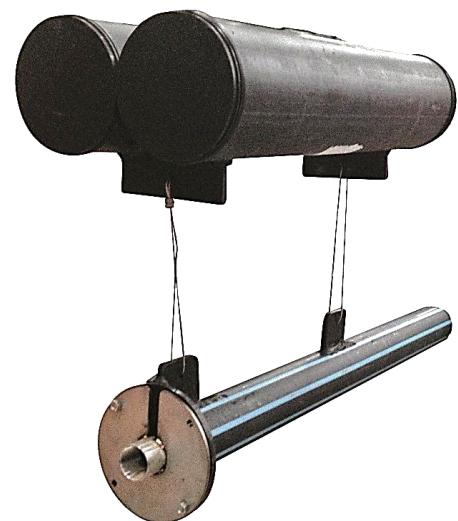

SubDrive 75, SubDrive 150 & SubDrive 300

SubDrive Solar,

Any 4" FPS pump and motor combination.

A centraliser is included with each pontoon shroud to enable the motor end to be centrally located so as not to cause hot spots on the motor stator, allowing even flow around and along the motor.

Remember, heat kills submersible motors.

Price pages were recently distributed with our Solar price pages and dividers. For any further information about our pontoons and shrouds please contact your Area Sales Manager.
