New Product: Water Level Probes

The products keep coming. We now offer Water Level Probes.

The Level Probes can be set for high or low water levels or for an intermediate water level that allows a signal to be sent back to the control equipment to initiate a start or stop on the pump or valves within the system.

Level Probe features:

- 2 wire cable
- Stainless Teel conductivity probe
- 16 mm diameter probe
- Australian Made
- 10 metre length multiples
 - 20 to 100 metres
- 20 metre length multiples
 - 100 to 200 metres
- Level Probe Relay 2W available

Level probes are an important part of any control system and these can be easily incorporated into Franklin Electric CP3 control panels or custom built control panels.

Level probes are easily wired into existing control panels if a level control or probe terminal is available.

Attached is the new price page for the Level Probes, CON-3. Printed price pages will be available via our next print update.
